As a former Netscape subscriber and user I can tell you it wasn't the Microsoft Icon being on my computer that got me to switch, it was the ripoff cost of upgrading my Netscape to the latest versions. After switching I discovered how much better MS is than Netscape. So, now you are giving Netscape a subsidy by allowing them to sue Microsoft. This is unfair and wrong. It's nothing more than blackmail to Microsoft. What is the purpose, are you trying to destroy yet another company and leave in its wake another MOTHER BELL debacle???????
